Dear Parent/Guardian/Student:

Thank you for taking the correct first step towards safe, responsible and enjoyable operation of an ATV/UTV and/or snowmobile. Department Safety Education Courses are meant to provide students with basic knowledge on safe, responsible and ethical operation from which the student can build upon. Graduates of this course may not be ready to ride alone; most will require practice in a safe, controlled area and mentoring from an experienced operator. The parent, guardian, mentor and even the rider themselves must gauge whether the rider's experience, skill and comfort level are sufficient for public riding areas. Learning never ends; riders, mentors and companions all need to ride with a safety mindset and continuously strive to improve their skills.

Thank you and be safe!

A handwritten signature in black ink that reads 'Gary Eddy'.
