

Harvest Registration

For all deer, bear, turkey, sharp-tailed grouse, geese and select furbearers

All deer, bear, sharp-tailed grouse, turkey and geese are registered through [GameReg](#), an electronic registration system that collects harvest information from the hunter and returns a 10-character confirmation number as proof of registration. Hunters may register harvests over the internet or phone. For deer and bear, hunters may also visit an in-person registration station to register using one of the above methods. Bobcat, fisher and otter are **reported** through [GameReg](#) using the same options and **registered** in-person through conservation wardens and other authorized DNR personnel. Please visit [dnr.wi.gov](#), keyword "[trap](#)" for more information.

GO WILD WITH GAMEREG

Register in minutes online at [gamereg.wi.gov!](#)

Look up your confirmation number, print tags and more through your Go Wild account at [gowild.wi.gov](#).

How does GameReg work?

Hunters and trappers will have several options for registering or reporting their harvests, including:

- » **Online (fastest and easiest method):** On a computer or mobile device, go to [gamereg.wi.gov](#) and enter your harvest information.
- » **Phone:** Dial 1-844-GAME-REG (1-844-426-3734) and follow the prompts to provide harvest information.
- » **In Person (deer and bear):** Visit a designated in-person registration station that offers a phone or computer to hunters for registration. Participating [registration stations](#) will be listed on the department website prior to the start of the fall hunting seasons.
- » **Bobcat, fisher and otter: Report within 24 hours using one of the above methods.** Contact a conservation warden to register your harvest within 5 days of the end of the month of harvest.

Special Rules

- » **Registration of all deer, bear, turkey, sharp-tailed grouse, geese, bobcat, fisher and otter remains mandatory in Wisconsin!** It is not an option.
- » The following special rules do not pertain to bobcat, fisher and otter. Tagging, reporting and registration information for bobcat, fisher and otter can be found on the DNR website keyword "[trap](#)."
- » Upon successfully registering, hunters will receive a confirmation number that must be written *legibly* in the designated space on the carcass tag. This will indicate to a conservation warden, wildlife biologist, or meat processor that the animal has been properly registered.
- » The validated carcass tag does not need to be immediately attached to the animal as long as the hunter does not leave the animal. If you leave it, tag it!
- » The carcass tag with confirmation number written on it must be retained by the hunter until the meat is consumed. Protecting paper tags in a plastic zip top bag is recommended.
- » All deer, bear and turkey must be registered by 5 p.m. the day after the animal was recovered and tagged. Geese must be registered within 48 hours of harvest.
- » Although all registration is electronic, the department may require tissue sampling in some cases.
 - Tooth samples from all harvested bears are required. Collection materials and instructions will be mailed to permit holders prior to the start of the bear season.
 - CWD sampling continues in Wisconsin and hunters may be asked to submit tissue samples from deer. The department may require in-person registration.

Registration Reminders

- » You will need the carcass tag number from your carcass tag to begin the harvest registration process. Enter the correct zone, county/Deer Management Unit/Game Management Unit, and land type (deer only—public or private) during registration. When registering by phone, enter the correct [three-digit county code](#) when prompted by using your phone keypad to spell the first three letters of the county of kill (i.e. 232 for Adams).
- » If the animal has been harvested under the authority of an agriculture damage or nuisance permit, call 1-888-936-7463 to register.
- » Once all information has been entered and verified, GameReg will issue the 10-character confirmation number. Be sure to write this number on the carcass tag. If you exit the system before writing down the confirmation number, call 1-888-936-7463 for assistance.
