

Appendix C: List of Tables and Figures

List of Tables

Criterion One: Conservation of Biological Diversity

- Table 1.a: Forest land area
- Table 1.b: Estimates of Wisconsin urban forest area, population, and canopy cover
- Table 1.c: Urban forest species composition and frequency
- Table 1.d: Street tree species composition and frequency
- Table 1.e: Top 10 urban forest species by basal area
- Table 2.a: Forest land area by forest type, 2007 and 1996
- Table 2.b: Forest land area by forest type, 1996 and 1983
- Table 2.c: Growing stock volume by species group on forest land
- Table 2.d: Forest type group timberland acres, % by size class
- Table 2.e: Forest type group timberland acres, % by age class, 2007
- Table 2.f: Forest type group timberland acres, % by age class, 1996
- Table 2.g: Land area by vegetation cover type and ecological province
- Table 3.a: Average parcel size of privately owned forest lands
- Table 3.b: Number of owners and acres of private forest in Wisconsin by parcel size class
- Table 3.c: Area of forest land in Wisconsin by ownership category
- Table 4.a: Northern forest community types recognized by the Wisconsin Natural Heritage Inventory (NHI) program
- Table 4.b: Southern forest community types recognized by the Wisconsin Natural Heritage Inventory (NHI) program
- Table 4.c: Vertebrate Species of Greatest Conservation Need (SGCN) associated with forested communities in Wisconsin
- Table 4.d: Deer population and harvest data highlights since 1960

Criterion Two: Maintenance and Productive Capacity of Forest Ecosystems

- Table 6.a: Amount of forest products harvested by tribal members on WI & MI National Forests
- Table 6.b: Amount (lbs.) of special forest products permitted for harvest on the CNNF from 2004-2007

Criterion Three: Maintenance of Forest Ecosystem Health and Vitality

- Table 7.a: Mortality, gross growth and ratio of mortality to gross growth 1996-2007
- Table 7.b: Most common types of urban damage and frequency of damage type among trees with urban damage
- Table 8.a: Annual pollution removal by Wisconsin's urban forest
- Table 8.b: FIA P3 bioindicator trend ~2002-2007 (table showing annual trends in ozone injury)

Criterion Four: Conservation and Maintenance of Soil and Water Resources

- Table 10.a: Correct application of BMPs for water quality by landowner category
- Table 10.b: Application and effectiveness rates for wetland BMPs

Table 10.c: Application and effectiveness rates for forest road BMPs
 Table 10.d: Application and effectiveness rates for skid trail BMPs
 Table 10.e: Wisconsin certified Master Loggers
 Table 10.f: 2006 Assessment of rivers and streams and lakes, ponds, and reservoirs
 Table 10.g: Ten top probable sources of water quality impairment
 Table 10.h: Impairment caused by various factors
 Table 10.i: Percent Impaired Water for Fish and Aquatic Life State Designated Use
 Table 11.a: Watersheds per percentage of riparian area forested
 Table 11.b: Watersheds per percentage of impervious surfaces
 Table 11.c: Statewide summary of area, green space, and impervious surface land cover in urban, community, and urban or community areas

Criterion Five: Maintenance of Forest Contributions to Global Carbon Cycles

Table 12.a: State level forest carbon pools
 Table 12.b: Wisconsin forest carbon change over time

Criterion Six: Socioeconomic Benefits of Forests and their Ecosystem Services

Table 13.a: Forest certification – chain of custody certificates in 2009
 Table 13.b: Forest certification – 2009 Wisconsin chain of custody certificates
 Table 14.a: Wisconsin Resident Past, Present and Future Participation Trends
 Table 14b: Public recreational lands
 Table 14.c: Recreation supply typologies
 Table 14.d: Regional Recreation Supply Shortages
 Table 14.e: Statewide recreation trails
 Table 14.f: Public perspectives on top trail needs
 Table 14.g: ATV trail miles by ownership type
 Table 14.h: Public perspectives on top recreation needs
 Table 15.a: Forestry account expenditures fiscal years 2008 and 2009
 Table 15.b: USDA Forest Service Research Funds
 Table 15.c: K-12 forestry organizations level of funding and people served
 Table 15.d: Number of forestry graduates in the Great Lakes Region
 Table 15.e: Number of forestry graduates in the Great Lakes Region
 Table 15.f: Certified arborists in Wisconsin
 Table 15.g: Division of Forestry number of courses, hours, and average tuition
 Table 16.a: Area of private forest land in Wisconsin by ownership size, 1997-2006
 Table 16.b: Public land ownership in Wisconsin
 Table 16.c: Knowles-Nelson Stewardship Program purchases 1990-2008
 Table 16.d: Wisconsin Protected Lands - GAP Area 2009
 Table 16.e: Wisconsin Forest Legacy Program easements - 2009
 Table 16.f: Average property tax on Wisconsin forest land, 1970 - 2007
 Table 16.g: Managed Forest Law participation changes 1999-2009
 Table 16.h: Wisconsin forest certified acres
 Table 16.h.2: Total Wisconsin forest certified acres
 Table 16.i: U.S. and Lakes States land management forest certification
 Table 17.a: UW-Madison forestry professor payroll 2003-2007

Criterion Seven: Legal and Institutional Framework for Forest Conservation and Sustainable Management

Table 18.1a (example): Example showing four of the nine categories

Table 18.a: Statewide or Regional Statutory Forest Advisory Committees and Mission

Table 18.b: Forestry organizations

Table 19.a: Percent of communities with tree inventories

Table 19.b: Communities at Risk and Communities of Concern

Table 19.c: Status of master planning on DNR lands

Table 19.d: Tribe management plans

Table 19.e: Percent of communities with tree management plans (2008 DNR Community Forestry Survey data)

Table 19.f: Frequency of urban forest plan types (2008 DNR Community Forestry Survey data)

Table 19.g: Provisions included in community tree ordinances (2008 DNR Community Forestry Survey data)

Table 19.h: Number of structures lost and saved from wild fire

Table 19.i: Acres enrolled by owner type in MFL and FCL as of April 2009

Appendix F: Criterion Four Additional Data

Table F.1: Total soil carbon in Wisconsin forest land

Table F.2: Estimated bare soil in Wisconsin forest land

Table F.3: Bulk density at 0-10 cm soil depth in Wisconsin forest land

Table F.4: Calcium – aluminum ratio at 0-10 cm soil depth in Wisconsin forest land

Appendix G: Criterion Six Additional Data

Table G.1: Percent change in population, 1990-2008

Table G.2: Percentage change in Wisconsin forest land sale prices 1990 to 2007

Table G.3: Conservation and recreational lands in Wisconsin

List of Figures

Criterion One: Conservation of Biological Diversity

Figure 1.a: DBH distribution of urban trees in Wisconsin

Figure 1.b: Diameter distribution within the 10 most common street tree species

Figure 4.a: Forest cover of the Upper Mississippi watershed

Figure 4.b: Numbers of Species of Greatest Conservation Need (SGCN) that are State Endangered, State Threatened, or Special Concern

Figure 4.c: Population trends of birds associated with northern hardwood forests (1983-2007)

Figure 4.d: Population trends associated with early successional oak/hickory forests (1983-2007).

Figure 4.e: Population trends of bird species associated with oak/hickory forests (1983-2007)

Figure 4.f: Population trends of bird species associated with early seral aspen-birch

forests (1983-2007)

Figure 4.g: Population trends of bird species associated with older aspen-birch forests (1983-2007)

Figure 4.h: Population trends of bird species associated with young pine forests (1983-2007)

Figure 4.i: Population trends of bird species associated with older pine forests (1983-2007)

Figure 4.j: Population trends of bird species associated with northern hardwood swamps (1983-2007)

Figure 4.k: Population trends of bird species associated with lowland coniferous forests (1983-2007)

Figure 4.l: Population trends of bird species associated with upland spruce-fir forests (1983-2007)

Figure 4.m: American marten distribution in Wisconsin, 2008

Figure 4.n: Fisher harvest in Wisconsin, 1985-2007

Figure 4.o: Wisconsin fisher population 1984-2008

Figure 4.p: Bobcat populations and management goals

Figure 4.q: Bobcat harvests 1980-2007

Figure 4.r: Changes in Wisconsin gray wolf population and number of wolf packs 1980-2008

Figure 4.s: Gray wolf distribution in Wisconsin (winter 2006-2007)

Figure 4.t: Wisconsin deer populations and goals, 1960-2008

Criterion Two: Maintenance and Productive Capacity of Forest Ecosystems

Figure 5.a: Percentage of forest land categorized as timberland compared to reserved and other forest land in Wisconsin, 2007

Figure 5.b: Amount of forest land categorized as timberland compared to reserved and other forest land in Wisconsin

Figure 6.a: Net annual growth and removals of growing stock on timberland in Wisconsin

Figure 6.b: Type of growing stock removals on timberland in Wisconsin, 2007

Figure 6.c: Volume of growing stock on timberland by tree grade, 1983-2007

Figure 6.d: Number of tribal members reporting harvest in WI & MI national reports

Figure 6.e: Paper birch, balsam fir, and sugar maple cubic feet 1983, 1996, 2007

Criterion Three: Maintenance of Forest Ecosystem Health and Vitality

Figure 7.a: Average annual mortality of growing stock that died from natural causes in 1983, 1996, and 2007.

Figure 7.b: Number of days between last and first frost in northern and southern Wisconsin from 1970 to 2005

Figure 7.c: Average annual Palmer Drought Severity Indices for Regions of Wisconsin
Figure 7.d: Percent of acreage by habitat type for FIA plots with a relative density of 10% or more
Figure 7.e: Number (in thousands) of acres of black, white and green ash by three basal area categories
Figure 7.f: UW Herbarium website for *Polygonum cuspidatum* distribution
Figure 7.g: GLIFWC website for *Polygonum cuspidatum* distribution
Figure 7.h: NIISS website for *Polygonum cuspidatum* distribution
Figure 8.a: Ash with ozone induced foliar injury.
Figure 8.b: Black cherry with ozone induced foliar injury
Figure 8.c - O₃ trends at 5 sites in Wisconsin ~1983-2007
Figure 9.a: Number of Fires and Acres Burned 1975-2008
Figure 9.b: Forest fire causes 1975-2008
Figure 9.c: Burning Permits Issued 2005-2008
Figure 9.d: Comparison of fires by NFDRS adjective level 1975-2008
Figure 9.e: Prescribed burns and number of acres 2002-2008

Criterion Five: Maintenance of Forest Contributions to Global Carbon Cycles

Figure 12.a: Wisconsin forest carbon pools by forest type
Figure 12.b: Wisconsin's forest carbon distribution by pool

Criterion Six: Socioeconomic Benefits of Forests and their Ecosystem Services

Figure 13.a: Forest industry value added (constant 2007 dollars)
Figure 13.b: Total value of shipments
Figure 13.c: 2007 Production of roundwood
Figure 13.d: Roundwood production by species group and product
Figure 13.e: 2007 Production of roundwood from softwood species (cubic ft.)
Figure 13.f: 2007 Production of roundwood from hardwood species (cubic ft.)
Figure 14.a: Statewide supply of campsites
Figure 15.a: NA S&PF grant funding to Wisconsin
Figure 15.b: NA S&PF grants to Wisconsin 2008
Figure 15.c: State forestry revenues 1999-2009
Figure 15.d: Forestry account expenditures
Figure 15.e: Source and amount of forestry research funds
Figure 15.f: Wisconsin forest products manufacturing total capital expenditures
Figure 15.g: Percent of total capital expenditures within Wisconsin manufacturing
Figure 15.h: Forestry related degrees granted by U.S. institutions 2002-2008
Figure 15.i: Division of Forestry fire and non-fire training expenditures 2008
Figure 15.j: Federal fire grant support 2004-2008
Figure 15.k: Fire management costs
Figure 15.l: Forest Fire Protection (FFP) Grant
Figure 15.m: Incident Command System (ICS) training gaps by position
Figure 16.a: FRED®: [Resident population in Wisconsin 1900 to 2008](#)
Figure 16.b: FRED® - [Per capita personal income in Wisconsin 1930 to 2008](#)
Figure 16.c: 2006 Area of Wisconsin forest land by ownership

Figure 16.d: Area of Wisconsin forest land by ownership by year
Figure 16.e: Large industrial forest ownerships by category, 1999-2007
Figure 16.f: DNR land acquisition and resources available
Figure 17.a: Wisconsin forest products industry – total payroll in current and constant (adjusted for inflation) 2007 dollars
Figure 17.b: Wisconsin forest industry employment
Figure 17.c: Wisconsin manufacturing and wood related employment 1990-2008
Figure 17.d: Division of Forestry budgeted FTE
Figure 17.e: Number of cooperating forester firms and number of foresters working for those firms
Figure 17.f: Wisconsin forester employment statistics
Figure 17.g: Wisconsin logging equipment operators – employment statistics
Figure 17.h: Wisconsin log graders and scalers – employment statistics
Figure 17.i: Wisconsin forestry and conservation teachers (post secondary) – employment statistics
Figure 17.j: University of Wisconsin - Stevens Point forestry professors
Figure 17.k: UWSP forestry professor average pay – current and constant (2008) Dollars

Criterion Seven: Legal and Institutional Framework for Forest Conservation and Sustainable Management

Figure 19.a: Decade of management plan approval by owner and number of acres managed
Figure 19.b: Acres in WI Forest Tax Laws under industrial status 1999 - 2007
Figure 19.c: Acres of expiring NIPF lands enrolled under the MFL program by year of expiration.
Figure 19.d: Acres of MFL open and closed from 1997 to 2008 for all ownership groups.

Appendix E: Criterion One Additional Data

Figure E.1: Sections and subsections of Wisconsin (WDNR 2002)
Figure E.2: Ecological Landscapes of Wisconsin (WDNR 2001)
